AUTHOR INDEX TO VOLUME 22

Abbott, I.—
Changes in the abundance and activity of certain soil and litter fauna in the jarrah forest of Western Australia after a moderate intensity fire 463

Adams, J. A.—
See Karageorgis, D. 471

Aitken, R. L., Campbell, D. J., and Bell, L. C.—
Properties of Australian fly ashes relevant to their agronomic utilization 43

Akpokodje, E. G.—
The influence of rock weathering on the genesis of gypsum and carbonate in some Australian arid zone soils 243

Amato, M., Jackson, R. B., Butler, J. H. A., and Ladd, J. N.—
Decomposition of plant material in Australian soils. II. Residual organic ^{14}C and ^{15}N from legume plant parts decomposing under field and laboratory conditions 331

Anand, R. R., and Gilkes, R. J.—
The retention of elements in mineral pseudomorphs in lateritic saprolite from granite—a weathering budget 273

Barnes, C. J., and Aylmore, L. A. G.—
A theoretical treatment of the effects of ionic and non-ionic competitive adsorption during solute transport in soils 31

Barrow, N. J.—
See Whelan, B. R. 283, 293

Barrs, H. D.—
See Jayawardane, N. S. 109

Beckmann, G. G.—
The place of 'genesis' in the classification of soils 1

Bell, L. C.—
See Diggle, A. J. 135; Aitken, R. L. 443

Blair, Graeme J.—
See Friesen, D. K. 81

Bond, W. J., Gardiner, B. N., and Smiles, D. E.—
Movement of $CaCl_2$ solutions in an unsaturated clay soil: the effect of solution concentration 43

Bradley, J., Vimpany, I., and Nicholls, P. J.—
Effects of waterlogging and subsequent drainage of a pasture soil on phosphate sorption, extractable phosphate and oxalate-extractable iron 455

Brennan, R. F., Gartrell, J. W., and Robson, A. D.—
Relations of copper with soil affecting its availability to plants. III. Effect of incubation temperature 165

Butler, J. H. A.—
See Amato, M. 331

Calf, G. E.—
See Drury, L. W. 379

Campbell, C. A., Myers, R. K. K., Catchpoole, V. R., Vallis, I., and Weier, K. L.—
Laboratory study and transformation and recovery of urea–N in three Queensland soils 433

Campbell, D. J.—
See Aitken, R. L. 443

Cartwright, B., Zarcinas, B. A., and Mayfield, A. H.—
Toxic concentrations of boron in red-brown earth at Gladstone, South Australia 261

Catchpoole, V. R.—
See Campbell, C. A. 433

Chan, K. Y.—
See McGarry, D. 99

Childs, C. W., Dickson, D. P. E., Goodman, B. A., and Lewis, D. G.—
Moessbauer parameters for ferrihydrites at 4 K 149

Collis-George, N., and Figueroa, B. S.—
The use of high energy moisture characteristic to assess soil stability 349

Colwell, J. D., and Morton, R.—
Development and evaluation of general or transfer models of relationships between wheat yields and fertilizer rates in southern Australia 191

Coughlan, K. J., and Loch, R. J.—
The relationship between aggregation and other soil properties in cracking clay soils 59
See also Loch, R. J. 91

Cowling, Janine C.—
See Ross, D. J. 319

Dahiya, I. S.—
See Kumar, S. 253

Dharmasiri, J. K.—
See Drury, L. W. 379

Dickson, D. P. E.—
See Childs, C. W. 149

Diggle, A. J., and Bell, L. C.—
Movement of applied phosphorus following the mining and revegetation of mineral sands on Australia's east coast 135

Drury, L. W., Calf, G. E., and Dharmasiri, J. K.—
Radiocarbon dating of groundwater in Tertiary sediments of the eastern Murray Basin 379

Figueroa, B. S.—
See Collis-George, N. 349

Fleming, P. M.—
See Gunn, R. H. 119

Ford, G. W.—
See Rengasamy, P. 413

Freney, J. R.—
See Ledgard, S. F. 155

Friesen, D. K., and Blair, Graeme J.—
A comparison of soil sampling procedures used to monitor soil fertility in permanent pastures 81

Gardiner, B. N.—
See Bond, W. J. 43

Gartrell, J. W.—
See Brennan, R. F. 165

Gilkes, R. J.—
See Anand, R. R. 273; Hughes, J. C. 475

Gillman, G. P.—
Using variable charge characteristics to understand the exchangeable cation status of oxic soils 71

Goodman, B. A.—
See Childs, C. W. 149

Greene, R. S. B., and Wilson, I. B.—
Some physico-chemical properties of the exposed B horizon of a red-brown earth treated with gypsum 357
See also Rengasamy, P. 413

Gregg, P. E. H.—
See Mohammed, I. H. 173; Scotter, D. R. 181

Gunn, R. H., and Fleming, P. M.—
The estimated store of soluble salts in the Lake Eyre catchment in Queensland and their possible transport in streamflow to the lake 119

Gupta, S. K.—
See Pandey, R. S. 23

Hughes, J. C., and Gilkes, R. J.—
The effect of chemical extractant on the estimation of rock phosphate fertilizer distribution 475

Hutton, J. T., Prescott, J. R., and Twidale, C. R.—
Thermoluminescence dating of coastal dune sand related to a higher stand of Lake Woods, Northern Territory 15

Jackson, R. B.—
See Amato, M. 331

Jayawardane, N. S.—
Determination of the swelling characteristics of soil using neutron and gamma density meters 389

Jayawardane, N. S., Meyer, W. S., and Barrs, H. D.—
Moisture measurement in a swelling clay soil using neutron moisture meters 109

Karageorgis, D., Tonkin, P. J., and Adams, J. A.—
Textural layering in an Ochrept developed on a Holocene floodplain 471

Kumar, S., Malik, R. S., and Dahiya, I. S.—
Water retention, transmission and contact characteristics of Ludas sand as influenced by farmyard manure 253

Ladd, J. N.—
See Amato, M. 331

Ledgard, S. F., Freney, J. R., and Simpson, J. R.—
Variations in natural enrichment of ^{15}N in the profiles of some Australian pasture soils 155

Lewis, D. C.—
See Childs, C. W. 149

Loch, R. J.—
Field rainfall simulator studies on two clay soils of the Darling Downs, Queensland. III. An evaluation of current methods for deriving soil erodibilities (*K* factors) 401

Loch, R. J., and Coughlan, K. J.—
Effect of zero tillage and stubble retention on some properties of a cracking clay 91
See also Coughlan, K. J. 59

McGarry, D., and Chan, K. Y.—
Preliminary investigation of clay soils' behaviour under furrow irrigated cotton 99

McIntosh, P. D.—
Genesis and classification of a sequence of soils formed from aeolian parent materials in East Otago, New Zealand 219

Malik, R. S.—
See Kumar, S. 253

Mason, W. K., Small, D. R., and Pritchard, K. G.—
Effects of irrigation and soil management for fodder crops on root zone conditions in a red-brown earth 207

Mayfield, A. H.—
See Cartwright, B. 261

Mehanni, A. H.—
See Rengasamy, P. 413

Meyer, W. S.—
See Jayawardane, N. S. 109

Mohammed, I. H., Scotter, D. R., and Gregg, P. E. H.—
The short-term fate of urea applied to barley in a humid climate. I. Experiments 173
See also Scotter, D. R. 181

Morton, R.—
See Colwell, J. D. 191

Myers, R. J. K.—
See Campbell, C. A. 443

Neall, V. E.—
See Stewart, R. B. 365

Nicholls, P. J.—
See Bradley, J. 455

Orchard, V. A.—
See Ross, D. A. 303

Pandey, R. S., and Gupta, S. K.—
Analysis of breakthrough curves: effect of mobile and immobile pore volumes 23

Prescott, J. R.—
See Hutton, J. T. 15

Pritchard, K. E.—
See Mason, W. K. 207

Pullar, D. M.—
See Willatt, S. T. 343

Rengasamy, P., Greene, R. S. B., Ford, G. W., and Mehanni, A. H.—
Identification of dispersive behaviour and the management of red-brown earths 413

Rhoades, D. A.—
See Ross, D. J. 303

Robson, A. D.—
See Brennan, R. F. 165

Ross, D. J., Orchard, V. A., and Rhoades, D. A.—
Temporal fluctuations in biochemical properties of soil under pasture. I. Respiratory activity and microbial biomass 303

Ross, D. J., Speir, T. W., Cowling, Janine C., and Whale, Karina N.—
Temporal fluctuations in biochemical properties of soil under pasture. II. Nitrogen mineralization and enzyme activities 319

Scotter, D. R., Mohammed, I. H., and Gregg, P. E. H.—
The short-term fate of urea supplied to barley in a humid climate. II. A simple model 181
See also Mohammed, I. H. 173

Simpson, J. R.—
See Ledgard, S. F. 155

Small, D. R.—
See Mason, W. K. 207

Smiles, D. E.—
See Bond, W. J. 43

Speir, T. W.—
See Ross, D. J. 319

Stewart, R. B., Neall, V. E., and Syers, J. K.—
Occurrence and source in quartz in six basaltic soils from Northland, New Zealand 365

Syers, J. K.—
See Stewart, R. B. 365

Tonkin, P. J.—
See Karageorgis, P. 471

Twidale, C. R.—
See Hutton, J. T. 15

Vallis, I.—
See Campbell, C. A. 433

Vimpany, I.—
See Bradley, J. 455

Weier, K. L.—
See Campbell, C. A. 433

Whale, K. N.—
See Ross, D. J. 319

Whelan, B. R., and Barrow, N. J.—
The movement of septic tank effluent through sandy soils near Perth.
I. Movement of nitrogen 283
II. Movement of phosphorus 293

Willatt, S. T., and Pullar, D. M.—
Changes in soil physical properties under grazed pastures 343

Wilson, I. B.—
See Greene, R. S. B. 357

Zarcinas, B. A.—
See Cartwright, B. 261

Printed by CSIRO, Melbourne
